Birdie's eMAR: explained

Digitise your MAR charts, monitor medication and audit in real-time.

Monitor events in real time

Deal with concerns instantly to protect your client's wellbeing and make sure the care you deliver is as safe as possible.

Reduce the risk of error

By monitoring medication in real-time, you can decrease the risk of human error and reduce safeguarding issues.

Audit whenever, wherever

With a complete record for every medication administered, missed, or not recorded - auditing becomes easy.

Update MAR charts instantly

When medication or a dosage is updated or changed in the Birdie Agency Hub, it's instantly visible to your care staff.

Real-time alerts
Get alerted in real-time of any medication issue raised by your staff and act on them instantly.

Medication scheduling
Easily create and manage all your clients' medication schedules digitally.

Record and administer from the app
Care staff have instant access to all the information they need to administer medication safely when visiting clients.

"Safeguarding due to simple mistakes on a MAR chart are completely avoided now. [carers] have to go through the list on Birdie. And it flags up straight away if something has been missed."
Asfana, Prioritising People's Lives
